AS

SUMMARY

Passionate full-stack web developer with a solid foundation in programming and software development. Currently pursuing a Master of Computer Applications, I excel in blending front-end design with back-end functionality to create seamless and efficient web applications. Successfully built a comprehensive web solution during the Learnext Hackathon.

EDUCATION

Master of Computer Application

School of Computers, IPS Academy

📅 09/2024 - Present

Bachelor of Computer Application

Daksh Academy, Dhar

📅 09/2021 - 07/2024

EXPERIENCE

Full Stack Web Developer Intern — Flipr Labs

📅 01/2025 - 03/2025

Company specializing in innovative web and tech solutions

- Engineered full-stack web applications with HTML, CSS, JavaScript, Next.js, Node.js, and MongoDB.
- Designed responsive, user-friendly interfaces and seamlessly connected them with backend systems.
- Implemented authentication systems, CRUD functionalities, and dynamic data management.

SKILLS

Bootstrap	CSS	Django	GitHub	HTML
JavaScript	MongoDB	Next.js	PHP	Python
React	Visual Studio Code	Node.js	SQLite	
MySQL	C Language			

KEY ACHIEVEMENTS

💎 **Learnext Hackathon:**
Created *HostelHunt*, a complete web application for managing hostel accommodations.

PROJECTS

HostelHunt Web App:

- Built a platform to help students and individuals search, book, and manage hostels or PGs.

Weather App:

- Delivered real-time weather forecasts based on user location.

Blog Platform:

- Designed an engaging platform for publishing and sharing informative content.

Tour & Travel App:

- Developed a system for users to plan, book, and organize trips effectively.
